

Polyethylene Sheet

Temprotech provide shipyards, contractors and outfitters with flame retardant protection products that meet the exacting demands of the Shipbuilding, Shiprepair and Offshore markets.

Protecting floors, surfaces or equipment and maintaining clean work environments are essential to the successful progress and completion of new building or installation projects and during periods of maintenance, repair or refurbishment.

Flame retardant protection materials can reduce dirt, spillages overspray and accidental damage, and eliminate fire hazards for a safer working environment, saving time and money on clean-up, replacement and repairs before handover.

For quick and efficient covering of large areas and open spaces, polyethylene sheet up to four metres wide are supplied in roll form - widths greater than 2m are folded before rolling. They can also be used for covering and wrapping of equipment and the containment of dust, dirt and overspray within work areas.

Narrow widths can be supplied for corridors and walkways to provide a versatile, low cost protection solution that can be applied quickly and easily.

This sheet can also be supplied with anti-static properties and custom printed with your logo for identification and promotional purposes.
