

Rubber Matting and Tiles

Temprotech provide shipyards, contractors and outfitters with flame retardant protection products that meet the exacting demands of the Shipbuilding, Shiprepair and Offshore markets.

Protecting floors, surfaces or equipment and maintaining clean work environments are essential to the successful progress and completion of new building or installation projects and during periods of maintenance, repair or refurbishment.

Flame retardant protection materials can reduce dirt, spillages overspray and accidental damage, and eliminate fire hazards for a safer working environment, saving time and money on clean-up, replacement and repairs before handover.

Technically advanced rubber-based matting is suitable for most external deck protection applications.

Durable ribbed rubber matting provides a good anti-slip deck protection while inter-locking rubber tiles can be used to create excellent heavy duty deck protection pads. One version has superior drainage capabilities and another offers heavy-duty shock absorption for use in creating Drop Zones for containers and equipment on deck.

Bevelled edging strips are available for the perimeter of areas created with dovetail edge tiles to reduce the trip hazard and allow easy access for trolleys etc.

Part No.	STANDARD ITEMS				
	TPT3RM	TPT6RM	TPT9RM	TPT17RMDT	TPT17RMDT-MINI
Appearance	Fine ribbed top, cloth finish reverse			Anti-slip, dovetail edges	Anti-slip, dovetail edges
Material	Natural black rubber matting			Natural black rubber matting	Natural black rubber matting
Hardness (Shore A)		65		70	70
Abrasion Resistance		480mm ³		400mm ³	400mm ³
Width		1.0m		1.2m	0.5m
Length		10m		1.8m	0.5m
Thickness	3.0mm	6.0mm	9.0mm	17.0mm	17.0mm
Weight per unit	40kg	80kg	120kg	40kg	4kg
