Temprotech

**flame retardant
temporary protection**

who ?

Temprotech specialise in supplying flame retardant temporary protection materials to assist ship owners, operators, yards, contractors and outfitters in the continued drive towards total protection and fire safety. They represent leading international manufacturers and have more than thirty years experience of supplying protection materials that meet the exacting demands of the global cruise, ferry, naval and mega-yacht shipbuilding, shiprepair and offshore markets.

what ?

Protection materials range from simple polyethylene sheeting through to heavy duty rubber or high density foam panels, rolls or sheets of polypropylene, woven glass-fibre fabrics with various coatings or laminations, scrim-reinforced sheet, adhesive tapes and films or cellular protection boards and bespoke die-cut protection boxes.

All of Temprotech's materials are flame retardant but can be enhanced with additional properties; anti-static, halogen-free, clean-peel, UV resistant, self-adhesive, anti-slip and custom print.

when ?

Taking appropriate measures to protect items of capital equipment and maintaining clean, well-protected work environments are essential to the successful progress and completion of new building or installation projects and during periods of maintenance, repair or refurbishment.

Different grades of protection material are available to best suit the anticipated work levels, project duration and the degree of protection required by contractors or customers.

where ?

Temprotech's materials are used in marine and offshore markets worldwide for the protection of floors, surfaces and equipment within the workspace. Protection should be used wherever there is a risk of contamination from dust, dirt and overspray or accidental damage through foot traffic, transportation, impact, negligence or cutting, welding and painting activities.

why ?

A wide range of protection materials to meet your requirements.

Reduce damage to finished surfaces, floors and equipment.

Save time and money on clean-up, replacement and repairs.

Eliminate fire hazards for a safer working environment.

Meet industry and customer standards or insurance requirements.

Clearly identify and promote your company's activities.

product range

Temprotech's product range is continuously updated in response to market needs and products enhanced to provide innovative, effective and economic solutions that offer superior performance and peace of mind. Visit our website for full details of the range.

flame retardancy and certification

Temprotech's protection materials are rigorously tested. Ease of application, removal and disposal, performance, durability and cost of ownership are all carefully considered before products are submitted for flame retardancy testing and certification to a variety of internationally recognised FR Standards including; LPCB's LPS1207 and LPS1215, French M Norms, German DIN Standards, Euro Norms, NFPA 701 and FAR 25.853, INM, NATO and IMO Approval etc.
