

Pre-formed U, L and O shaped profiles are available in different dimensions in order to suit a range of applications. Extruded from PE-LD foam they offer effective edge protection for vulnerable surface corners and edges. Pre-slit for easy application, the profiles provide impact protection and are particularly suitable for door frames, bannisters, handrails and pipework. Simply fit and secure with tape or cable ties.

L-shaped profiles can also be supplied with a removable adhesive strip pre-applied to make fitting the protection even quicker and simpler - although the adhesive strip keeps the protection material in place, it can be easily, quickly and cleanly removed without residue.
