

For quick and efficient covering of large areas and open spaces, polyethylene sheeting up to four metres wide are supplied in roll form - widths greater than 2m are folded before rolling. They can also be used for covering and wrapping of equipment and the containment of dust, dirt and overspray within work areas. Narrow widths can be supplied for corridors and walkways to provide a versatile, low cost protection solution that can be applied quickly and easily.

Three different thicknesses of polythene sheet are available to provide an optimal match for different protection requirements from light to heavy duty, short to long term, low to high traffic etc.

This sheet can also be supplied with anti-static properties and custom printed with your logo for identification and promotional purposes.
